## **Qualifying Explanatory Statement in support of the Achievement of and Ongoing Commitment to Carbon Neutrality**

Application Period: January 1, 2021 – December 31, 2021

**Date: 21/04/2023**

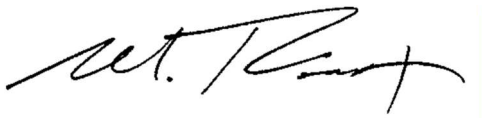

# 1. Executive Summary

This document is the Qualifying Explanatory Statement (QES) which provides collected evidence in support of the declaration that Bentley Motors, Inc:

1. has achieved carbon neutrality for its Americas Retailer Network for the period commencing January 1, 2021 to December 31, 2021 (see Section 3); and
2. is committed to maintaining carbon neutrality for its Americas Retailer Network (see section 4).

The carbon neutrality declaration has been made and the collected supporting evidence has been provided in accordance with the requirements prescribed by PAS 2060:2014 – Specification for the demonstration of carbon neutrality.

Michael Rocco

Vice President Sales and Operations

## 2. General information

PAS 2060 Requirement	Information Relating to the Carbon Neutral Declaration
<b>Entity making PAS 2060 declaration:</b>	Bentley Motors, Inc.
<b>Subject of PAS 2060 declaration:</b>	Bentley Motors, Inc. has facilitated the certification of its Americas retailer network consisting of fifty-nine (59) independently franchised retailers.
<b>Description of Subject:</b>	Bentley Motors Inc. is the exclusive distributor of Bentley luxury vehicles in the Americas. Bentley Motors Inc. has 59 independently franchised retailers who act as Sales and Aftersales points across the Americas. They are: Bentley Boston Bentley Cleveland Bentley Edison Bentley Greenwich Bentley Long Island Bentley Manhattan

Bentley Palmyra New Jersey
Bentley Paramus
Bentley Pittsburgh
Bentley Washington DC
Bentley Atlanta
Bentley Downers Grove
Bentley Gold Coast
Bentley Minneapolis
Bentley Nashville
Bentley Northbrook

### 3. Declaration of achievement to carbon neutrality

PAS 2060 Requirement	Information Relating to the Carbon Neutral Declaration
<b>Declaration of achievement:</b>	Carbon neutrality of the Bentley Americas Retailer Network achieved by Bentley Motors Inc in accordance with PAS 2060 (21/04/2023) for the period commencing 1 January 2021 – 31 December 2021 certified by the Carbon Trust.
<b>Recorded carbon footprint of the subject during the period stated above</b>	Total emissions: 5200.90 tCO <sub>2</sub> e (Market-based) Total Emissions per square foot: 0.00891 tCO <sub>2</sub> e (Market-based)  See section 3.2 for further details.
<b>Carbon offsets purchased</b>	5258 tCO <sub>2</sub> e See section 3.4 for further details.

#### 3.1. Carbon footprint methodology

PAS 2060 Requirement	Information Relating to the Carbon Neutral Declaration
<b>Description of the standard and methodology used to determine GHG emissions and reductions</b>	<p>The methodology for calculating the carbon footprint was as follows: The operational boundary of analysis included all the scope 1 (fuel combustion, owned transport, process emissions and fugitive emissions) and scope 2 (purchased electricity, heat, and steam) emissions of the Bentley Americas Retailer Network.</p> <ul style="list-style-type: none"> <li>All the emissions were calculated using primary data. The overall data quality for the project was good, mainly because all the data came from invoices provided by each dealership’s internal accounting systems. The authenticity of this data was checked and verified through a query log and email communications with our external consultancy, the Carbon Trust. Interviews were undertaken with a representative random sample to review source data as well as the wider systems of data collection and how the data is managed.</li> <li>To calculate scope 1 emissions, activity data was collected for each site and multiplied by the relevant emission factor (sourced from 2020 BEIS) to generate a footprint figure in tCO<sub>2</sub>e. For scope 2 emissions, a location-based and market-based approach was used, and the emissions factor reflects the regions “grid average”.</li> </ul>

	<p>This methodology was developed to be in accordance with the requirements of GHG Protocol Corporate Accounting and Reporting Standard (including supplementary Scope 2 guidance).</p> <p>The provisions of the methodology for calculating the carbon footprint were applied as detailed and the principles set out in PAS 2060 were met.</p>
<p><b>Justification for the selection of the methodologies chosen</b></p>	<p>The methodology used in the current footprint is consistent with the internationally recognised GHG Protocol Corporate Accounting and Reporting Standard.</p> <p>Scope 3 emissions were omitted this year as it was the first year Bentley Motors, Inc. has attempted to obtain a carbon neutrality certification for its Americas retailers. As such, there was a lack of obtainable scope 3 data as well as knowledge of the ISO process to include scope 3 this year-round.</p>

<b>Exclusions</b>	Whilst Scope 3 is optional in determining an organisation's carbon footprint we will endeavour to expand the scope where practicable and where said reductions can be achieved by the organisation.	

### 3.3. Carbon offsets

PAS 2060 Requirement	Information Relating to the Carbon Neutral Declaration
<b>Offset methodology</b>	A sufficient number of offsets (VCS, CDM, Gold Standard, ACR, VER) have been purchased by each Retailer of the required quality according to PAS2060 from now Climate Impact Partners (CIP) a profit-for-

	purpose organization specializing in carbon offsetting services for corporates.
<b>Offset Confirmation</b>	<p>The offsets generated represent genuine, additional GHG emission reductions elsewhere. Projects involved in delivering offsets meet the criteria of additionality, permanence, leakage and double counting. Carbon offsets are verified by an independent third-party verifier.</p> <p>The credits from the selected carbon offset projects are:</p> <ul style="list-style-type: none"> <li>• only issued after the emission reduction has taken place.</li> <li>• retired within 12 months from the date of the declaration of achievement.</li> <li>• supported by publicly available project documentation on a registry which provides information about the offset project, quantification methodology and validation and verification procedures.</li> <li>• stored and retired in an independent and credible registry.</li> </ul>
<b>Offsets</b>	Full details of the carbon offsets included in making this declaration are provided in Appendix 1.

## 4. Declaration of ongoing commitment to carbon neutrality

PAS 2060 Requirement	Information Relating to the Carbon Neutral Declaration
<b>Declaration of on-going commitment:</b>	<p>Bentley Motors Inc commits to the facilitation of maintaining carbon neutrality for the Bentley Americas Retail Network in accordance with PAS 2060 for the period 01/01/2022 and ending on 31/12/2022.</p> <p>Carbon neutrality for the Bentley Americas Retail Network for the period 01/01/2023 and ending on 31/12/2023 will be achieved by 20/04/2024.</p>

### 4.1. Carbon management plan

PAS 2060 Requirement	Information Relating to the Carbon Neutral Declaration
Targets for GHG reduction for the defined subject appropriate to the timescale for achieving carbon neutrality	<p>Bentley Motors Inc will facilitate a recommended and targeted carbon reduction plan for each of its fifty-nine (59) retailers. Reductions will be assessed on a market-based approach with an intensity metric based on gross floor area (GFA). As each business is independently owned and operated, these carbon reduction actions will vary. Actions are based on Bentley's recommendations – retailers must commit to a minimum of 3 actions per year to reduce their emissions to a level lower than the year</p>

	<p>before. Equivalent alternatives can be developed by retailers and approved by Bentley.</p>
<p>Planned means of achieving and maintaining GHG emissions reduction</p>	<ul style="list-style-type: none"> <li>• A comprehensive training plan will be rolled out to all Retailer employees to increase engagement and awareness of Sustainability during 2022/2023. Training will cover a staged approach from general awareness and importance in 2022 to operational 'toolkits' for retailers to use per business area that offer practical insights into where measures can be taken to reduce emissions. This training program will be facilitated by Bentley's official Global Retailer Academy with the ability to track attendance and completion of the course. Specific reduction initiatives are listed in Appendix 4.</li> <li>• Consideration should also be given in case of the relocation of Retailer facilities in the intervening 12 months as part of the re-certification process.</li> <li>• A plan of recommended actions per year for retailers has been provided in the backup for this document. As mentioned above, this is a list for retailers to choose from but is not limited to these actions. Alternative actions may be developed by each business individually to reduce emissions. Please refer to Appendix 4.</li> </ul>
<p>The offset strategy to be adopted</p>	<p>A sufficient number of offsets will be purchased by each Retailer of the required quality according to PAS2060 from <b>Climate Impact Partners</b> a profit for purpose organisation specialising in carbon offsetting services for corporates for any residual emissions in the intervening 12 months.</p>

# Appendix 4: Retailer Carbon Reduction Action Planning

## RETAILER CARBON REDUCTION ACTION PLANNING AMERICAS 2023 – 2026

Actions build from 'quick win' lower investments towards long term, higher investments.

### IMPORTANT NOTES

- Actions & the timings shown are based on Bentley's recommendations – retailers must commit to 3 actions per year to reduce their emissions to a level lower than year before. Equivalent alternatives can be developed by retailers and approved by Bentley.
- As each retailer is independently owned and operated, these carbon reduction actions may vary in scope and timing.
- Recertification is based on a reduction of carbon emissions each year – no % target is specified within this first year.
- Bentley will facilitate meetings with Retailers and require they turn in a detailed reduction plan.
