

BENTLEY

Bentley Environmental Mission Statement

Going beyond zero

We aim to become a leader in sustainable luxury.

We are committed to go beyond the 2 degrees goal of the Paris Climate Agreement. Therefore, we aim to be an end-to-end carbon neutral luxury brand. In our operations, we aim to have a positive impact, by removing more emissions than we create.

We intend to maximize resource efficiency and promote circular economy approaches in the areas of materials, energy and water. Our approach will apply to the entire lifecycle of our future generation of products – from raw materials until end-of-life – and is designed to keep ecosystems intact and drive positive impact.

By our voluntary commitments, we will exceed compliance with environmental regulations.

Targets for 2025

Climate Change

We will ensure all our operations become climate positive. We aim to include not just our current vehicles but also those built in our past

Our future BEVs will be end-to-end carbon neutral, including transparent supply chain and tail pipe emissions

Resources

We will reduce the production-related environmental impact (CO2, energy, water, waste and VOC) by 75% per vehicle compared to 2010

We will make our operations plastic neutral.

Environmental Compliance

By adopting the highest standards of environmental compliance in our management systems, we will be one of the leaders of transparency and integrity

We aim to become a biodiversity role model at our Bentley Campus in Crewe.
