THE TORCAL RANGE

The Torcal Range

The Torcal is the first all-new Bentley for more than a decade. It takes the Bentley hallmarks of unrivalled luxury and thrilling performance and elevates them to a whole new level, thanks to a new, all-electric powertrain and a wealth of innovative technology.

Available in a choice of two models – the Torcal and the Torcal S, which pushes the car's performance and sports styling even further – this is the most powerful production Bentley ever built.

The Torcal marks the beginning of a new era, both in Bentley's approach to design and craftsmanship, and in the way a car can use technology to respond to the needs of its occupants. After more than a century of relentless Bentley innovation, would you expect anything less?

CO₂ Emissions, electricity consumption data and electric range for EU27 are pending, subject to EU Type Approval.

A choice of exquisite models

The Torcal is available in two models, each combining phenomenal performance with extraordinary craftsmanship.

Torcal

The quintessential Torcal, offering a stunning fusion of elevated design and immersive technology.

DISCOVER

Torcal S

Striking sports style paired with incredible power and dynamic handling, for a truly exhilarating drive.

DISCOVER

CO₂ Emissions, electricity consumption data and electric range for EU27 are pending, subject to EU Type Approval.

Torcal

The Torcal model offers the perfect balance of exhilarating electric performance and progressive, life-enhancing luxury.

The moment the car is unlocked, the floating diamond grille gradually illuminates – part of a welcome sequence unique to this model.

Inside, ergonomic curved screens meet natural wood veneers, amid sumptuous, hand-finished leather, with the option to add pure Merino wool.

It all adds up to a unique fusion of forward-looking design, thrilling electric power and wellbeing-focused technology.

TO DESIGN

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Torcal S

The Torcal S takes Bentley's sleek new design vision and injects extra sporting attitude. Black detailing is used in place of satin silver, for a subtly stealthy aesthetic.

It's just one aspect of a visual style that befits a car offering incredible performance, from its groundbreaking power and torque figures to its revolutionary chassis technology – not to mention the inclusion of Launch Control, for truly breathtaking acceleration.

In the new world of electric cars, consider this the state of the art.

TO DESIGN

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Torcal First Edition

The Torcal First Edition is a celebration of the craftsmanship, performance and technology that makes Bentley's first all-electric vehicle so special. It comes equipped with a wealth of exclusive features, alongside a selection of the most desirable options.

The car is fitted with exclusive 22" First Edition wheels, each one finished in black with spokes painted in Liquid Silver and brake callipers painted in Graphene Grey. An optional Carbon Fibre bodykit injects extra sporting attitude, giving the car an even more muscular stance, while optional Carbon Fibre mirror caps and First Edition badging complete the picture.

Inside, Carbon Fibre is used for the veneers, while the handcrafted seats feature a quilt pattern unique to this car and 'First Edition' treadplates ensure that everyone who steps inside is aware of its status.

Market specific. Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

DESIGN

A new design vision

The Torcal may be Bentley's first fully battery-powered vehicle, but there is much more to this car than its powertrain. That's because it is the first production Bentley to showcase a new design direction for Bentley.

Moreover, this is a car designed to be as comfortable in the city as it is on the open road. That means a more compact footprint than a traditional large SUV, while maintaining a muscular stance that evokes the car's power. Short overhangs, wide wheel arches and sleek proportions all add to its road presence, making it clear that this is very much a performance SUV.

From the side, the silhouette is clean and elegant, while minimal exterior detailing ensures a contemporary aesthetic. This is the beginning of a new chapter in Bentley design.

Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets.

BENTLEY Design Team

John Jacobus 26.11

Illuminating details

A long bonnet bears the new Bentley ‘wings’ emblem – making the Torcal the first Bentley ever to display this new version. Along each side of the car, meanwhile, a strip of metal detailing gives the impression of a single line from the rear to the bonnet, finished in satin silver on the Torcal model and black on the Torcal S.

Combining intricate craftsmanship and technological innovation, the Floating Diamond Grille features a beautiful glowing surround and a further 76 illuminated diamond motifs within, each one applied by hand. Together with the exquisite new HD projection headlamps, it forms part of a revolutionary approach to the use of light in exterior design.

Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets.

Elegance in profile

Approaching the car from the side reveals a number of remarkable features. Welcome Lamps project the Bentley 'wings' emblem onto the ground from the underside of each door. They can be upgraded even further, however, to the optional Dynamic Light Projection by Mulliner, a unique lighting system built into the side sills, which works with the welcome lamp animation to project a sequence all the way down the side of the car. As well as adding a sense of drama, it offers a similarly spectacular welcome animation for passengers entering or exiting the car.

Any of the doors can be opened and closed electrically, if this option is selected, by tapping on the touchscreen or the My Bentley app, or at the touch of a button. Even plugging your seatbelt in when the door is open can prompt it to close.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Final flourishes

With a design inspired by the luggage carrier of the historic 'Blue Train' Bentley, the tailgate features a powered open and close function. Below that, a gloss black 'horseshoe' shape adds dynamism, emphasising the vehicle's sporting credentials.

The tail lamps – red on the Torcal model and dark-tinted on the Torcal S – feature a slim new horizontal design with an intricate 3D diamond structure inside. As with every aspect of this car, the closer you look, the more there is to see.

Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets.

Design: Torcal

The exterior of the Torcal features the stunning new Floating Diamond Grille, with a glowing surround and 76 individually applied, illuminated black-centred diamonds. A satin silver strip runs from the tailgate, along the side of the car and into the bonnet.

Exclusive to this model, the Bright Design Specification is an optional package that replaces the standard 21" Flux wheels with 22" Turbine wheels in your choice of either a machined and Tungsten-painted finish or a machined and black-painted finish. It also replaces the black centres of the diamonds in the grille with polished silver centres, while the welcome animation performed by the headlamps and grille is even more striking.

TO INTERIOR

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Design: Torcal S

The styling of the Torcal S evokes the car's dynamic character and power.

All the exterior details – including the Bentley wording and 'wings' emblem, the 'S' badges on the fenders and the strip that runs down the side of the car – are finished in black. The Floating Diamond Grille, meanwhile, delivers a stunning welcome animation sequence unique to the Torcal S model, every time you lock or unlock the car.

Red brake callipers accompany the 22" S wheels, while black door mirror caps, black sport sills, black mouldings on the front bumper and black strakes on the outer edges of the lower bumper all add to the car's road presence. At the back, a sports-style rear diffuser adds dynamic attitude, while even the internal structures of the tail lamps have been treated to a darker finish.

TO INTERIOR

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

INTERIOR

A new age of automotive craft

Inside the Torcal, Bentley's focus on hand-craftsmanship and natural materials comes together with groundbreaking digital design.

From the natural wood grain of the veneers to the warm textures of pure Merino wool, sustainable finishes are on display throughout. Satin chrome, bright chrome or black switchgear is elevated with bronze highlights in selected areas, while diamond knurling lends a tactile quality to switchgear and rotary controls.

In response to your selection of drive mode, the car can dynamically adjust everything from seat settings to the ambient lighting – even the sound the vehicle emits as it moves. This is a cabin in which light, sound and space are as important as physical materials.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

A new benchmark for seating

The front seats feature 16-way electrical adjustment, alongside heating, ventilation and massage functions, and memory settings that let you access your preferred set-up in seconds. The rear bench seat includes powered seatback tilt and powered forward and backward adjustment, plus heating for the two outer seat positions. You can optionally add soft comfort headrests and ventilation. To make loading and unloading easier, the rear seats can be electrically raised and lowered flat using controls in the boot.

The optional Wellness Seating system comprises two ingenious features for the front seats. Seat Auto Climate monitors the humidity and temperature at the surface of each front seat and uses the heating and ventilation functions to respond. Postural Adjust, meanwhile, uses air pockets inside each front seat – in the cushions as well as the seat back – to vary the pressure on your muscles throughout your journey. Though the effect is virtually imperceptible, it reduces fatigue significantly, especially on long journeys.

Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets.

A breath of fresh air

Ever since the Bentley T-Series made its debut in 1965, all Bentley cars have featured the brand's hallmark Bullseye air vents. Now, with the launch of the Torcal, the interior design team at Bentley has taken the opportunity to build on that legacy: electronically controlled, 360-degree Bullseye Vector Sphere air vents. Designed to deliver the sensation of a continuous ring of air, each one delivers two air streams that subsequently converge into a single vector for quiet, effective ventilation.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Frosted Diamond Switchable Sunroof

A panoramic sunroof runs the length of the Torcal's cabin. When shade is required, you can activate the optional electrically switchable layer in an instant, changing the sunroof from clear to a frosted appearance, in complete silence. Quieter, faster and less obtrusive than any other shading mechanism, it also allows you to split the glass into shaded areas and clear areas divided using Bentley's unique frosted diamond pattern, which gives you even more control over light levels in your car. The front section of the sunroof can be opened, using the electrical tilt and slide functions.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Dynamic Waterfall Lighting

Dynamic Waterfall Lighting offers a stunning, nature-inspired lighting effect.

Achieved by applying more than 450 LEDs to the inside of the doors and the lower instrument panel, it delivers a range of colours in a constantly changing, dynamically rendered display, adding a sense of theatre to every journey – especially when travelling at night.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Ahead of the curve

At the heart of the fascia is a vertically curved, 12.25" HD touchscreen. The first OLED screen to be fitted in a Bentley, it offers sharp, fast visuals, with vivid colour and true blacks. Together with the 14.25" horizontally curved OLED driver's display behind the steering wheel, as well as an augmented reality Head-Up Display, it provides safe and easy access to all the information and functionality you need.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

A place for everything

Intelligently designed storage areas have been placed throughout the car.

The boot offers a capacity of 421 litres beneath the parcel shelf, rising to 560 litres with the parcel shelf removed – giving you plenty of room for bags and cases, pet crates and more. With the rear bench seat folded down, it offers a full 1,276 litres of space. There is a further 90 litres of storage space in the 'frunk' beneath the bonnet.

Throughout the cabin, you will find cleverly designed stowage spaces. They include front and rear cup holders, a cooled phone charging pad, a key slot, a pen holder and a hidden area beneath the central touchscreen that enables you to store a phone or keys out of sight.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Interior: Torcal

The cabin of the Torcal model features a single-colour upholstery pattern. Leather is used for the lower parts of the cabin, while the upper areas are clad in Dinamica, a sustainable suede-like material.

Open Pore Crown Cut Walnut veneers add warmth and sophistication, while the satin finish of the brightware and metal trim imbues the entire space with contemporary style.

The Bright Design Specification – an optional package exclusive to this model – adds the luxurious Harmony Diamond Quilt to the upper parts of the seats, alongside fluted quilting for the door inserts and Dynamic Waterfall Lighting. It also includes the Colour Specification, which gives you the opportunity to commission two-tone upholstery throughout the cabin.

SPECIFICATIONS AND OPTIONS

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Interior: Torcal S

The cabin of the Torcal S makes the car's sporting ethos clear, from the moment you step over the illuminated treadplates and take your seat inside.

The upholstery features a two-tone colour layout unique to Bentley's S models, with leather used for the lower parts of the cabin and tactile Dinamica for sections including the seat cushions and backs, the door inserts, the roof lining and the steering wheel. The quilting and embroidery on the seats is also exclusive to the S model.

Piano Black veneers lend the entire space a contemporary look – an effect intensified by the dark chrome brightware – while machined Sports Pedals add character. Dynamic Waterfall Lighting is also included, as are thoughtful details such as illuminated seat belt buckles.

SPECIFICATIONS AND OPTIONS

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

TECHNOLOGY

Immersive technology

The arrival of this revolutionary car represents a whole new approach to automotive technology – a vision of luxury road travel that combines lifestyle-enhancing connectivity with the latest advances in intelligent passenger wellbeing.

From systems that make driving safer and easier, to sensors that help optimise the comfort and health of you and your passengers, every new feature has been designed to feel natural in use. After all, technology only really works when it makes everyday life easier – not more complex.

Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets.

Embrace the open road

Every Torcal features a comprehensive suite of Advanced Driver Assistance Systems (ADAS). These systems include an Augmented Reality (AR) Head-Up Display, which projects key driving information – such as changing speed limits and directions from the navigation system – into your line of sight, so you never need to take your eyes away from the road.

The car also includes an Adaptive Cruise Control system as standard, which enables you to take your feet off the pedals when driving on the highway and major roads, for a more relaxing journey. It will ensure you maintain an appropriate distance between your Torcal and the car in front – even if traffic slows to a stop and starts again.

The optional Touring Assist package provides even more help with long-distance driving, allowing you to remove your hands from the wheel completely, subject to compliance with local regulations. It will steer for you within limits, as long as you keep your eyes on the road, and it can assist with lane changes by looking for a gap in traffic once you have indicated to change lanes, then accelerating and steering to execute the manoeuvre, as soon as appropriate.

Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets.

Effortless manoeuvres

Parking made even easier

The Intelligent Park Assist* function can identify a suitable parking space, then take control of the steering and pedals while it parks your Torcal. And for occasions when the space is so tight that it would be hard to get in or out of the vehicle once parked, you can use Remote Park Assist*, accessed via the My Bentley smartphone app. Simply step out of the car before parking and tap the button in the app that activates remote parking. Then hold the button down until your Torcal has safely parked itself. The car will stop moving straight away if you stop holding the button for any reason. When you return to the car, you can use the system to drive it out of the parking space, so you can comfortably get back in.

Valet-style parking

In addition to parking in spaces on the street and in car parks, your Torcal can record the route into and out of your garage, so that once you are home, it can complete the manoeuvre without any need for you to touch the steering wheel, accelerator or brake pedal.

In fact, the car can record and store five separate manoeuvres, each of up to 200 metres in length.

Stress-free reversing

Whenever you drive at low speeds, the Reversing Assist feature will store in its memory the last 50 metres you drove, so that if you need to reverse out again, it can manage the steering for you, making the manoeuvre effortless. If you have a trailer attached, you can use the rotary controller to indicate where you want your trailer to go, before the car takes control of the steering.

Protection in tight spaces

Manoeuvre Assist provides an extra layer of safety for you and your car, by monitoring the environment in hard-to-navigate spaces and braking automatically if necessary. Rim Protection Assist, meanwhile, will alert you if the car detects a risk that you might scrape your wheels.

*The driver must constantly supervise the manoeuvre and be able to intervene at any time to maintain safety. Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Technology that makes life easier

The Torcal provides access to a wide range of digital and internet-enabled features*, many of which can be accessed in the car or via the My Bentley smartphone app.

A car you can talk to

Natural speech interaction enables you to control functions in the car such as the navigation system, or ask for help with anything from the climate system to cruise control. It even allows you to access information on the web, just by asking the car.

EV ownership made easy

From route plans that includes the best places to stop and charge, to making payments at charging stations automatically, the Torcal has been designed to make driving an electric vehicle more seamless and stress-free than ever.

Managing your car remotely

With the My Bentley app, you can prompt the car to park itself for you, while you watch. You can use your phone as the key, unlocking or locking the car as required. You can use it to check the status of the locks, lights, charging status and range, wherever you are. You can pre-heat or pre-cool the cabin, or heat individual seats, armrests and the steering wheel. You can defrost the windows before your journey begins and, if you opt to add electrically powered doors, you can open any door with just one tap. You can even use the app to demonstrate the car's welcome lighting sequence.

Proactive assistance**

As well as responding to your needs, the Torcal has been designed to think ahead and anticipate them. From identifying locations where you can park to minimising wait time at traffic lights, it makes city driving truly effortless. It can highlight potential maintenance issues before they become urgent, and it can alert you if anything untoward happens while your car is parked, for example if the alarm is activated.

Please refer to Specifications and Options pages for standard and optional features.

Not all options are available on all models and within all markets.

*With additional data plan purchased through a mobile network operator.

Vehicle connectivity and service availability varies by market. Please confirm specification with your local certified Bentley Retailer.

**Market specific.

Android is a trademark of Google LLC.

Apple CarPlay is a registered trademark of Apple Inc.

Wireless by design

Internet connectivity is available for all occupants, thanks to a built-in Wi-Fi hotspot.*

Content on your phone can be accessed in your car wirelessly, through Android™ Auto or Apple CarPlay™. Phone content is always shown on the top section of the curved central touchscreen, leaving the section below free to display user-defined widgets for your most frequently used vehicle functions, which means no driving information is obscured.

Market specific. *With additional data plan purchased through a mobile network operator. Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Bentley Dynamic Symphony

Bentley has always appreciated the importance of the way a car sounds. This has led to the creation of a suite of sounds that together, represent the Torcal's sonic identity. From functional indicators and alerts to the welcome sound emitted when you unlock the car, it results in a whole new audio language.

Most important of all, however, is the sound you hear when you accelerate hard, in both Bentley and Sport modes. Inspired by the sound of Bentley V8 engines and created using live instruments, it responds naturally to your driving inputs, with thrilling changes in pitch. Consider it the ultimate soundtrack to the electric driving experience.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Incredible audio systems

Every Torcal is fitted with the 620-Watt Bentley Signature audio system as standard, featuring 16 speakers.

For those who demand truly unrivalled in-car audio, there is also the optional Naim for Bentley sound system to consider. Comprising 28 individual speakers for a maximum output of 1,780 Watts, this fully active system features individually configurable sound zones, Dolby Atmos 7.1.4 surround sound and speakers built invisibly into the driver's headrest – both for a heightened audio experience, and the discreet delivery of information from the car, such as navigation instructions, without disturbing the other occupants.

The Naim system also features metal speaker grilles bearing the Naim emblem in the centre, all finished either in satin chrome or dark chrome, depending on your interior choices.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Charge faster. Drive further.

Every Torqal is built on an 800V electrical system, to deliver incredible cruising range alongside exhilarating performance and extremely fast charging. In fact, at a 400kW charging station, you can add over 200 miles of range in around 10 minutes – less time than it takes most people to stop at a motorway service area, get a coffee and return to the car.

Range:

373 miles (600km)

Charging time (10%-80%):

16 minutes*

Range added in 10 minutes:

222 miles (357km)*

Battery warranty:

10 years or 160,000 miles

Provisional data. Subject to EU Type Approval. *Charging times for 400 kW chargers in EU/UK markets. Figures will vary by country. Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

PERFORMANCE

Electrifying performance

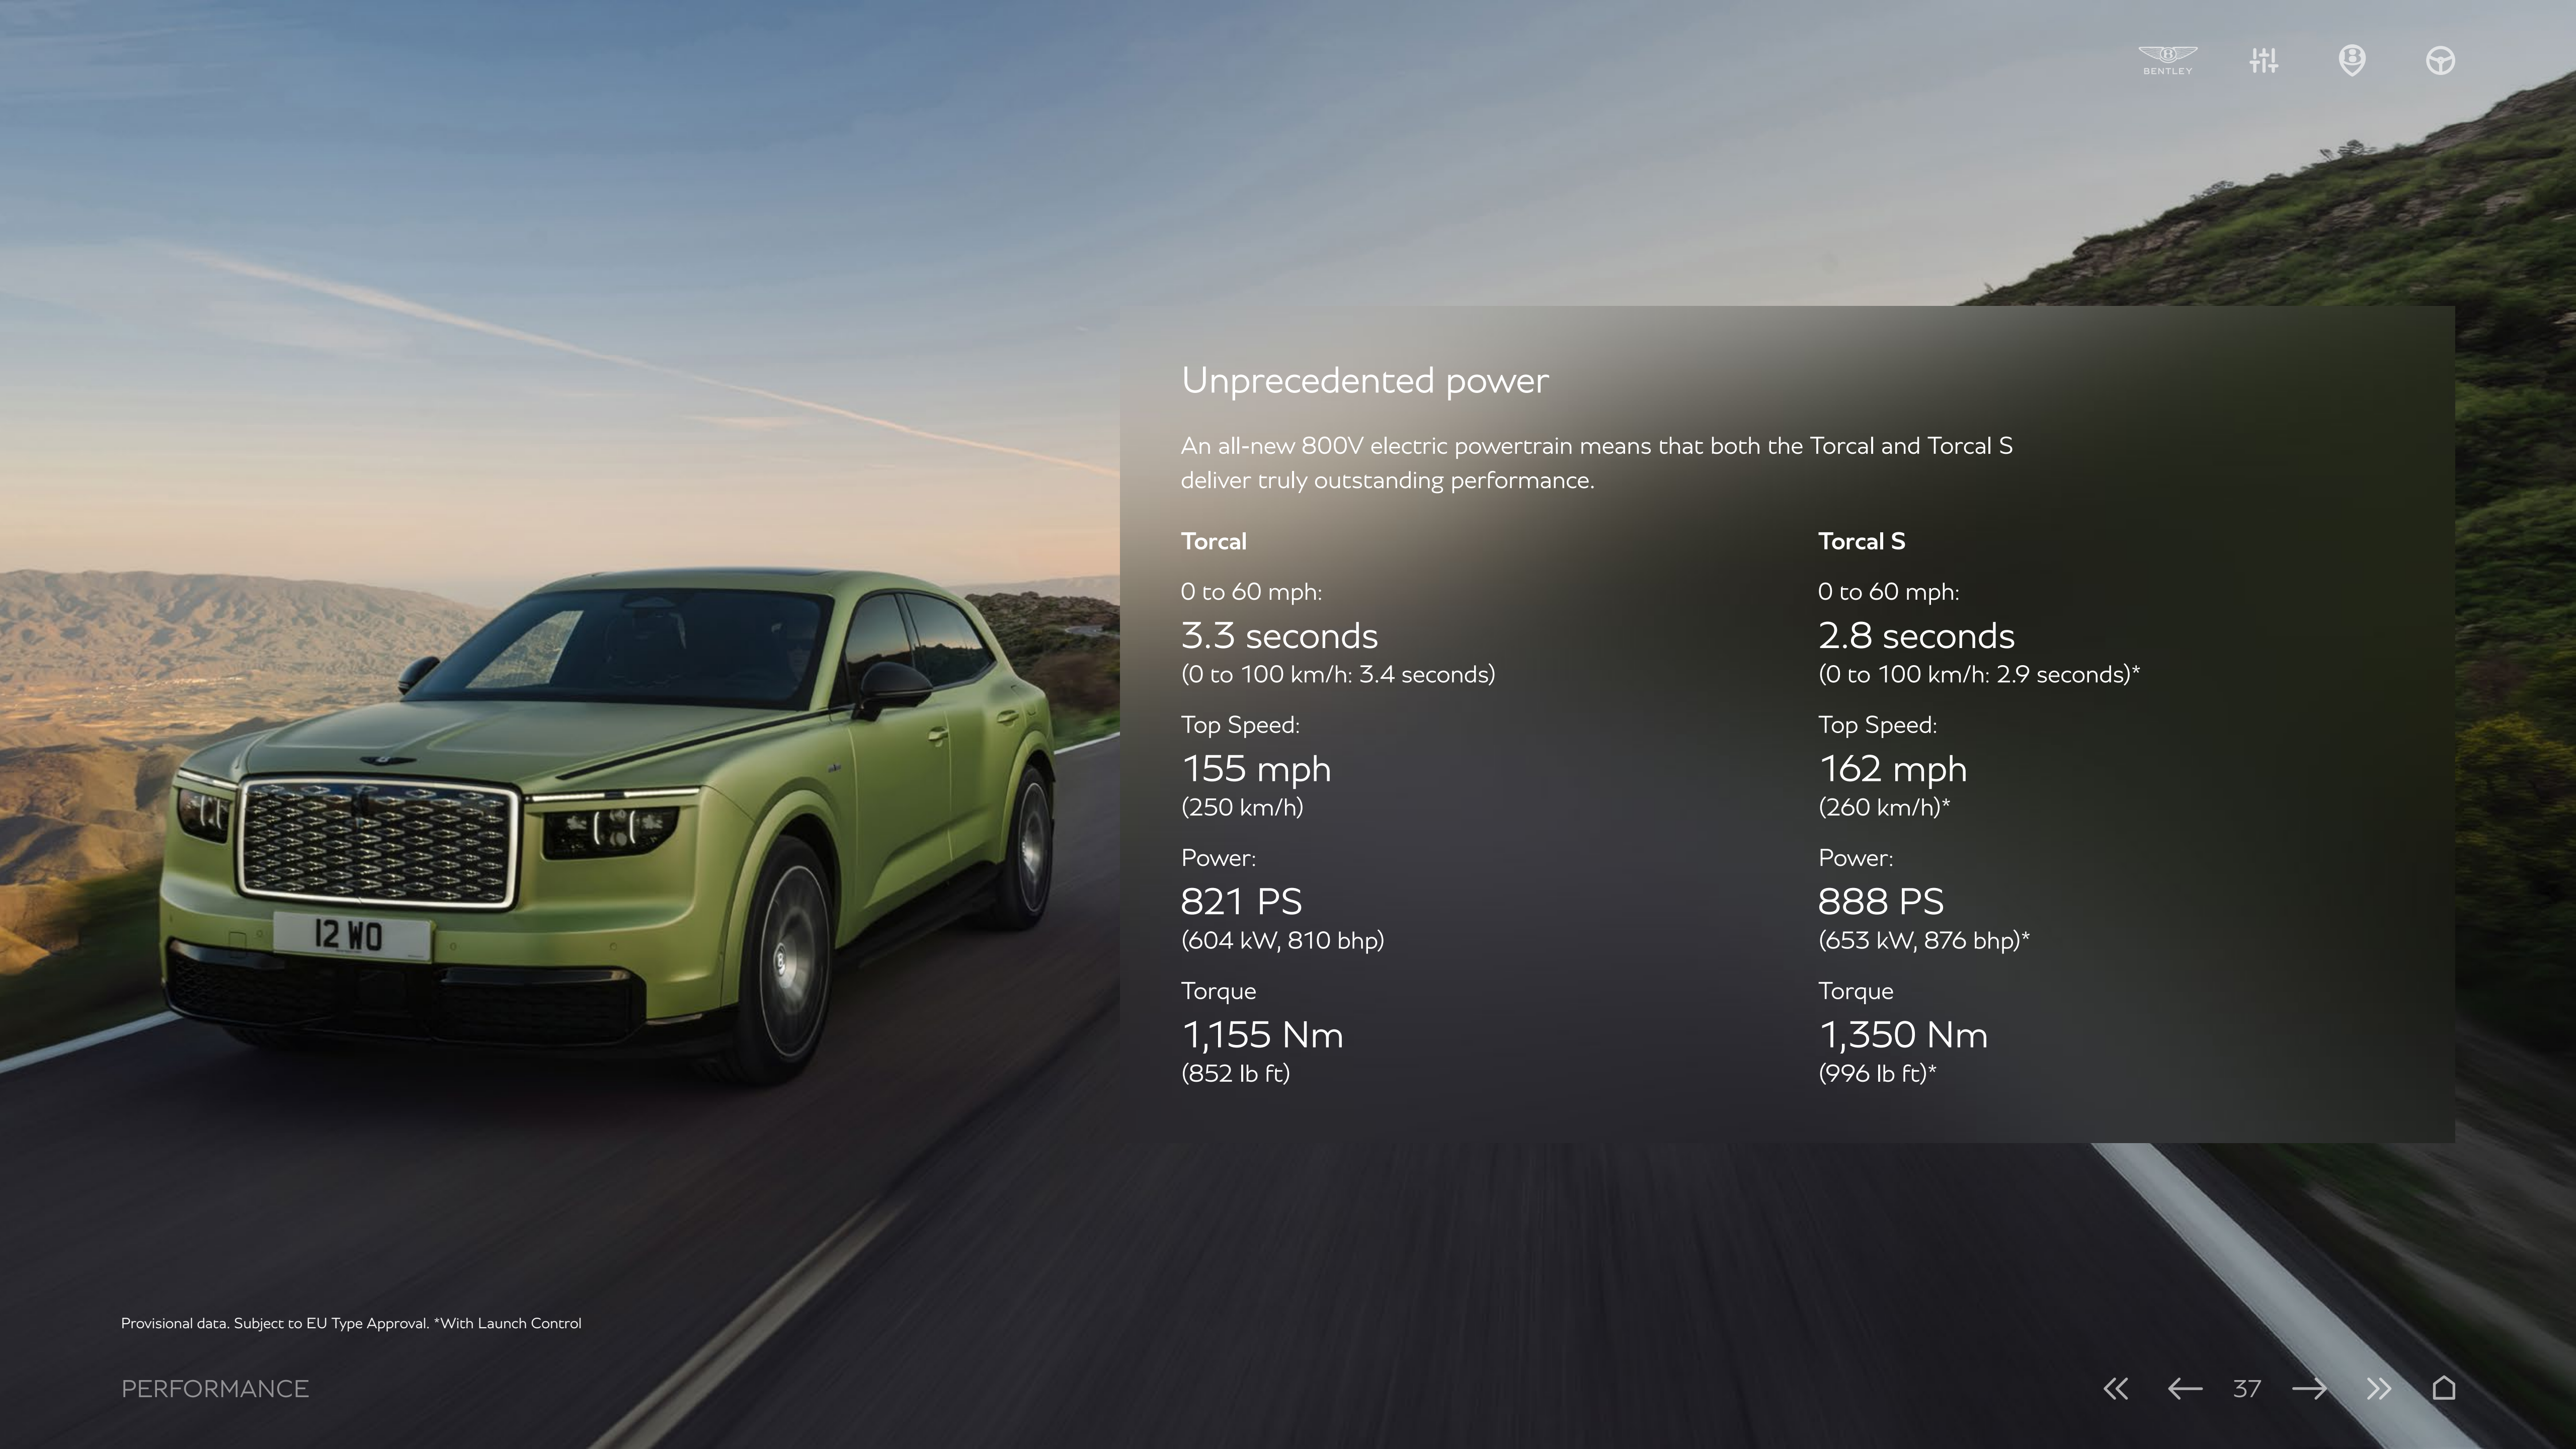

Throughout Bentley's history, the brand has been famous for its marriage of extreme power with an effortless quality. From 1919 until now, however, this has been achieved through Bentley's unique expertise in the engineering of petrol engines.

With the launch of the Torcal, everything under the bonnet has changed – yet everything about the experience stays the same. The incredible power delivered by the Torcal's advanced electric powertrain has been paired with unprecedented innovations in chassis technology, resulting in the most dynamic Bentley ever.

As has always been the case with Bentley, however, it is the entire driving experience that matters, rather than raw power alone. That's why every aspect of the drive – from the ambience in the cabin to the way the car corners at speed – can be calibrated to suit the needs of every individual driver.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Unprecedented power

An all-new 800V electric powertrain means that both the Torcal and Torcal S deliver truly outstanding performance.

Torcal

0 to 60 mph:
3.3 seconds
(0 to 100 km/h: 3.4 seconds)

Top Speed:
155 mph
(250 km/h)

Power:
821 PS
(604 kW, 810 bhp)

Torque
1,155 Nm
(852 lb ft)

Torcal S

0 to 60 mph:
2.8 seconds
(0 to 100 km/h: 2.9 seconds)*

(653 kW, 876 bhp)*

Torque
1,350 Nm
(996 lb ft)*

Provisional data. Subject to EU Type Approval. *With Launch Control

Next-generation suspension

Both Torcal models feature Bentley's next-generation active suspension and roll control system, Bentley Apex Ride. Unlike traditional systems that make use of anti-roll bars, it features a two-valve shock absorber on every wheel, each of which is connected to its own electrically controlled hydraulic pump, which means each damper can be raised or lowered individually.

This enables the system to minimise roll when cornering – achieving a similar effect to that of a motorcyclist leaning into a bend – without compromising on ride comfort when cruising in a straight line. Moreover, it allows for a wide range of driving experiences to be accessed by changing the vehicle's drive mode, from Comfort to Sport, which delivers truly unrivalled levels of control and driving excitement.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Electronic all-wheel steering

Both Torcal models feature electronic all-wheel steering.

At low speeds, the system makes small adjustments to the rear wheels of up to five degrees, so they steer in the opposite direction to the front ones. This reduces the car's turning circle to just 11.1m and makes negotiating tight spaces truly effortless.

At higher speeds, the system steers the rear wheels in the same direction as the front wheels, for smoother changes of direction and a sense of gliding from one lane to another. As well as making for a more comfortable ride for everyone onboard, it enables you to change lanes and overtake other vehicles with greater precision and confidence.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Beyond driving modes

Bentley has long offered a choice of driving modes in its vehicles. In the Torcal, however, this concept is elevated even further. Far from just changing the way the car drives, the new Curation Engine adjusts virtually every aspect of the way the car feels, by combining sound, the seat massage settings, the sunroof and the ambient lighting with your chosen driving dynamics, to deliver a holistic experience for drivers and passengers alike.

Selected via the glass-centred Curation Controller, there are four modes – Comfort, Sport, Bentley and Refresh – each offering a different driving character and interior environment. Even the style of the on-screen graphics changes with the mode you select.

If you need to drive off-road, two drive-only modes are available to maximise traction on slippery surfaces: Snow/Grass and Dirt/Trail.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

PERSONALISATION

Express yourself

With a host of accessories and styling options allowing you to configure your Torcal to your personal taste, it is highly unlikely you will ever see another one like yours.

You can choose from an extensive palette of exterior paint colours, all of which are designed to maintain their brilliance for many years to come. With numerous different wheel designs, hide options, beautiful natural veneers and distinctive trim options, almost every visible feature of your Torcal can be customised to your specification.

Exterior colours

There are seven standard exterior colours. In addition, you can also choose from an extended range that includes two completely new paints: the stunning Astral gloss finish and the satin Electrum.

For the ultimate in personalisation, Mulliner Personal Commission paint allows you to create bespoke colours.

Bespoke commissioning with Mulliner

In the early days of motoring, a new car would consist of an engine, drivetrain, four wheels and a set of controls – nothing more. Everything else was created by a coachbuilder, such as Mulliner.

Today, Mulliner works within Bentley to offer a variety of premium features and optional finishes, alongside bespoke customisation services.

For example, the team can colour-match any object you provide to create a unique paint colour. The same is true for your hides – any colour you can supply can be perfectly matched and made for you.

Further examples include personalised embroidery for your seats and exquisite marquetry inlays to your veneers. You can even work with them to design truly bespoke features for your car, with a co-creation appointment.

To learn more, visit the website or ask your Retailer about the Mulliner Personal Commissioning Guide.

Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets.

Specification Packages.

To make it even easier to specify your Torcal, our engineers and designers have created packages of features, from technology specifications that make driving easier to styling enhancements to suit your taste and lifestyle.

Accessories, servicing and maintenance

Genuine Bentley accessories represent an opportunity to personalise your Torcal even further. From the striking Carbon Fibre Styling Specification and our range of boot, bumper and floor mats to protect your car's interior from everyday activities, through to Paint Protection Film to preserve your car's appearance for years to come, there are many options to suit an array of lifestyles.

Consider this just one reason to bring your vehicle back to an official Bentley Retailer. Our unrivalled expertise, Bentley trained technicians, genuine Bentley parts and range of Service & Maintenance products can help keep your vehicle in the same impeccable condition as the day it left the factory.

The Bentley Collection

The Bentley Collection is a selection of lifestyle products inspired by the distinctive design of our cars. With many items lovingly crafted by highly skilled artisans, the Bentley Collection takes our exciting heritage and vision for the future, and seamlessly weaves it into extraordinary statement pieces.

From unique pieces for the home that elevate your everyday life, to lovingly crafted clothing and accessories designed with a distinctive eye for detail, you can bring Bentley's unrivalled refinement to every aspect of your life.

To view the complete range, please contact your local Bentley Retailer or visit the online store at **[Shop.BentleyMotors.com](https://www.shop.bentleymotors.com)**

The Bentley Factory Experience

Reserved for Bentley customers, this is a rare opportunity to step inside the beating heart of Bentley at our headquarters in Crewe.

The journey begins at CW1 House, where our expert hosts explain Bentley's heritage and pioneering spirit. You will then tour the factory, meeting the master craftspeople who bring every Bentley to life.

Witness first-hand the techniques and innovations that define our unique blend of luxury, performance, and craftsmanship. This is more than a tour – it's a personal experience. From exploring interior finishes to discovering exterior options, every detail is designed around you – and the team is on hand throughout, to help tailor your Bentley to your individual taste.

There is simply no better way to appreciate the passion that goes into every Bentley.
