Two exquisite models

The latest incarnation of the world's finest grand tourer is available in two truly remarkable models, both featuring the same all-new V8 hybrid powertrain.

Continental GT Speed

The name 'Speed' has long been used by Bentley to denote high performance. But never before has it represented such power.

The new Continental GT Speed ushers in a new era in Bentley performance – one powered by a truly groundbreaking new V8 hybrid powertrain. The result is truly astounding, delivering a step-change in power and acceleration. Harnessing it all is a suite of cutting-edge chassis systems, supported by the very latest in driver assistance technology.

This car also marks the debut of a stunning new design, featuring piercing new headlamps that dominate its striking new face. Elsewhere, dark-tint grilles and exterior details come together with exclusive badging, 22" wheels and a new body-coloured Styling Specification included as standard. It's a bold look, for a bold new era.

TO DESIGN

The legend continues

Building on the glorious reputation of the Bentley R-Type Continental, the Continental GT has become an automotive icon, defining grand tourer design.

The new generation takes things even further. The short overhangs and muscular haunches may seem familiar, as might the 'power line' that runs from the front wheel down the side of the car. Yet this is a wholly new car, with a new aesthetic entirely.

The steely gaze of the new headlamps is just the beginning. The front and the rear are entirely new – part of an overall aesthetic that makes the car look wider and more planted on the road. Its appearance is clean and modern, thanks to an array of new details including the tail lamps, tailpipe finishers, boot lid, bumpers, front fenders, grilles and diffusers.

In fact, this is a car that sets a new standard altogether – not just for the grand tourer, but for all luxury cars – today, tomorrow and beyond.

A grand design

Bringing a designer's vision to life can be a demanding task – especially when that vision is as striking as the new Continental GT.

Its sculptural form is made possible by an innovative combination of materials and manufacturing techniques. Superforming is one example. By heating large aluminium panels to 500°C, they can be shaped into sweeping curves that would be impossible to achieve using traditional methods. This has made it possible to eliminate the B-pillar between the front and rear side windows, for an even sleeker appearance.

Unlike the rest of the car, the boot lid is crafted from composite materials. This means the aerial can be positioned beneath the surface, without being insulated. So you can connect to radio stations, phone services and the internet, without the need for an unsightly external antenna.

The Continental GT is a true leap forward in grand tourer design.

The new face of exhilaration

In moving to a new single-headlamp design, the face of the Continental GT has undergone its biggest single metamorphosis since its introduction in 2003.

Inspired by the steely gaze of a big cat focusing on its prey, the single, oval lamps evoke focus and determination, their refined curved outline countered by the sharp edge of their new brows.

Between each lamp lies a new grille, exclusive to its respective model. The Continental GT Speed, for example, features a dark tint grille, to match the intense dark treatment applied to the rest of its exterior detailing, while the grille of the Continental GT Mulliner features a chrome floating-diamond design, to reflect its pinnacle status.

Design: Continental GT Speed

The new Continental GT Speed is a unique expression of sporting luxury, characterised by its dark, uncompromising road presence.

When the car is unlocked, the exterior lights perform a welcome animation exclusive to this model. In the centre of the car's face, meanwhile, sits a new dark tint matrix grille. More dark tint detailing can be seen elsewhere, from the lower bumper grilles to the sports exhaust finisher at the rear. It results in a more defined, purposeful appearance. The tail-lamps, meanwhile, have been treated with smoke-effect lenses.

Finally, sport sills and a new, body-coloured Styling Specification make the car appear even lower and closer to the road, while the 'Speed' fender badges leave its identity in no doubt.

TO INTERIOR

Design: Continental GT Mulliner

The new Continental GT Mulliner makes no secret of its status as the pinnacle of grand tourer design. Complementing its spectacular new form are numerous handcrafted details – not least its sparkling, floating-diamond Mulliner grille.

The painted and polished 22" Mulliner wheels feature self-levelling Bentley 'B' badges. The majority of the chrome brightware can alternatively be commissioned in black, by adding the Mulliner Blackline Specification – which also applies to the painted sections of the wheels. And when you open the door, one final surprise awaits: Animated Welcome Lamps by Mulliner beam a beautiful animation onto the ground, culminating in a glowing Bentley 'wings' emblem.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

15

The V8 hybrid powertrain

Combining an all-new turbocharged 4.0 litre V8 petrol engine with a powerful electric motor, this car can move faster, more smoothly and more responsively than any Bentley before it. In fact, the combined system can deliver 11% more torque than even the previous Continental GT Speed – and close to 20% more power overall.

The instant response of the electric motor provides a surge of instantaneous torque, for incredible acceleration, even from a standing start. No lag, no delay – just pure propulsion. This allows the engine to be tuned for maximum performance at higher revs, with the combined system delivering 800 Nm of torque at just 1,000 rpm, ultimately rising to a full 1,000 Nm, for incredible power and performance.

Switch to Sport mode and the effect is at its most pronounced: the car can take you right up to 60 mph in just 3.1 seconds and on to a top speed of 208 mph.

Figures shown are subject to final certification.

0 to 60 mph

seconds
(0 to 100 km/h: 3.2 seconds)

Top Speed

208 mph
(335 km/h)

Torque 1000 Nm (738 lb ft)

The cabin of the Continental GT Speed features an exclusive new quilting pattern, as well as the stunning new 3D diamond hide on the doors. Dinamica is used on the cabin roof, the pillars, the gear lever and the heated steering wheel – all part of an exclusive Speed hide combination. 'Speed' emblems, meanwhile, can be seen on the headrests and the fascia.

There is a vast range of veneers available, as well as optional finishes such as engine-turned aluminium or 'Côtes de Genève' for the centre console. You can opt for dual veneers by Mulliner, or choose from six piano veneers. The optional Dark Chrome Interior Specification, meanwhile, renders all the key, bright chromed components in a darker tint,

When you commission a Continental GT Speed, the standard specification is just the beginning of

Intuitive technology

Every Continental GT is equipped with the latest driver assistance technology, alongside a suite of Connected Car services, accessible both in-car and remotely, via the My Bentley app. The vehicle can harness infrastructure data to deliver services including real-time traffic information, green traffic light prediction and swarm services from other road users to warn you of potential hazards.

Inside, you can use the new My Bentley App Studio to download your personal choice of applications — which means you don't have to worry about your phone battery draining while you use it for music or navigation, for example. And if you do choose to use a third party navigation app, it will have access to your vehicle's fuel and/or charge levels, for more accurate journey planning.

You can even assign certain frequently-used functions – for example switching navigation announcements on or off – to a custom switch on the steering wheel, for easier access while driving.

Connect to more

The Continental GT is equipped with a wide range of Connected Car services*, accessed in-car or remotely via the My Bentley app.

Seamless integration

You can input a destination into the navigation system via the My Bentley smartphone app when you're away from your car, so you're ready to go the moment you get behind the wheel. Real-time traffic information can then dynamically re-route your journey if there is congestion, while Green Traffic Light Prediction will aid smooth passage through junctions.

Your choice of apps

With the new My Bentley App Studio, you can opt to download and use many third party apps for navigation, music, video and more, all within the Bentley infotainment system, accessed via the central touchscreen. This means you can use your preferred navigation system, for example, complete with integrated information from your vehicle, such as fuel and/or charge levels.

A personal experience

In the majority of markets*, your Continental GT is connected to the cloud, enabling all your personal settings to be stored remotely and accessed by the car as required. This means that even if you move between compatible Bentleys or to a new one, all navigation system destinations, light settings, seat settings and even your favourite radio stations can be downloaded immediately, making them available from the moment you get in.

A warm welcome

You can use the My Bentley app to remotely check the status of your locks, lights, mileage and fuel, as well as your electric-only range. You can also remotely pre-heat or pre-cool the cabin, with My Cabin Comfort. Just select your desired temperature and let the car's climate control system do the rest. You can even opt to heat individual seats, armrests and the steering wheel, or defrost the windows remotely, before your journey begins.

Leading the charge

E-charging allows you to plug your car into a charger and activate the charging process remotely via the app. Just enter the time you plan to set off, and the charging system calculates a charge rate that will give you the highest possible level of charge, just in time for your departure.

You're in safe hands

Emergency features include Private eCall and Roadside Assistance, which automatically connect you to a Bentley Emergency Call Centre or the Bentley Roadside Assistance team in the event of an accident. Furthermore, Theft Alert will notify you if the alarm is activated, giving you complete peace of mind.

Please refer to Specifications and Options pages for standard and optional features.

Not all options are available on all models and within all markets.

*Vehicle connectivity and service availability varies by market. Please confirm specification with your local certified Bentley Retailer.

Charging and driving your car

The new Ultra-Performance Hybrid powertrain offers five driving modes.

EV Drive: The default mode when you start the car, it offers emission-free, electric-only driving. It can take you up to 50 miles (80 km) without engaging the V8 engine, at speeds of up to 87 mph (140 km/h).

Hybrid: the car will intelligently decide when to employ the engine and when to use electric power alone, for optimum fuel efficiency and emissions. It will base its decisions on your speed and the road type. If you are using the navigation system, the car can automatically switch between electric and petrol power according to your route, preserving battery power for stretches of your journey that might require it, such as a low-emission zone.

Hold: preserves battery charge for later use, relying instead on the power of the V8 engine. While it will employ the electric motor at times, it prioritises a responsive drive over fuel efficiency.

Charge: the engine is used to charge the battery on the move. This makes it less fuel-efficient than Hold, however it can charge the battery up to 80%.

Sport Hold: Putting power and exhilaration first, this is the default when the Drive Dynamics control is set to Sport. It runs the V8 engine at all times, boosted by the electric motor, to unleash the car's full power.

When plugged in at home, the Bentley charging dock will provide a full charge in as little as two hours and 45 minutes. The E-Charging service – accessible via the My Bentley smartphone app or the car's navigation system – helps you find the nearest public chargers when you're on the road.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Exterior colours

Your Continental GT can be commissioned in a choice of seven exterior colours, as standard.

In addition, you can also choose from an extended range and a palette of Mulliner paints, which together give you a vast range of solid, metallic, satin and pearlescent options to choose from. In all, there are more than 80 colours – including the eye-catching new Tourmaline Green, a mid-to-dark metallic finish, and Gravity Grey, a sophisticated finish that appears solid until sunlight hits it, when it reveals sparkling copper accents.

For the ultimate in personalisation, Personal Commission Paint by Mulliner allows you to match a colour that is as unique as you are.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Specification packages.

To make it even easier to specify your perfect Continental GT, Bentley's engineers and designers have created groups of features, from technology packages that make driving easier to collections of exquisitely crafted styling enhancements.

LEATHER SPECIFICATION

Hide replaces Dinamica throughout:

- Seats
- Fascias
- Doors
- Rear quarter panels
- Steering wheel
- Hide trimmed gear lever

COLOUR SPECIFICATION

Opens up a range of additional interior options for the Continental GT:

- 10 additional hide choices
- Four additional colour combinations

MULLINER COLOUR SPECIFICATION

Eight new colours available for all stitching, piping and accent options.

TOURING SPECIFICATION

Digital assistance features for effortless cruising:

- Active Lane Assist
- Adaptive Cruise Assist Plus*
- Predictive Adaptive Cruise Assist*
- Night Vision
- Head-Up Display*

BLACKLINE SPECIFICATION

Replaces the exterior brightware with a gloss black trim:

- Black door handles
- Black gloss radiator matrix grille with black surround
- Black lower side blades
- Black rear bumper strike and number plate embellishers
- Black headlamp and tail lamp embellishers
- Black side window surrounds
- Black tailpipes

DIAMOND KNURLING SPECIFICATION

An intricate metal treatment applied to additional elements of the fascia and console:

- Knurled bulls-eye air vents
- Knurled dashboard clock bezel
- Knurled organ stops

DARK CHROME INTERIOR SPECIFICATION

Recommended in conjunction with exterior
Blackline Specification. Includes but not limited to:

- Door handles and switches
- Speaker grilles
- Bullseye air vents
- Organ stops
- Detailing on drivers instrument panel and steering wheel
- Gear lever
- Centre stack and centre console
- Headrest trim

FRONT SEAT COMFORT SPECIFICATION

The ultimate in Bentley comfort for the driver and front seat passenger:

- Ventilated seats
- Multi-mode massage seats
- Adjustable cushion length
- Adjustable side bolsters
- Electric headrests
- Hide-trimmed seat belt buckles
- Heated armrests

WELLNESS SEATING

- Postural Adjust
- Seat Auto Climate

MOOD LIGHTING SPECIFICATION

Multi coloured mood lighting:

- Seven different colours in two different palettes, vibrant or muted
- Matching illuminated 'BENTLEY' treadplates

SMOKER'S SPECIFICATION

- Solid metal ash can in front cabin
- Cigar lighters in front and rear

MULLINER BLACKLINE SPECIFICATION

Gives the exterior Black look to the Mulliner model:

- 22" Mulliner wheel in full black, or black and bright polished
- Side window surrounds in black
- Lower brightware in black
- Beluga mirror cap tops
- Rear brightware in black
- Headlamp and radiator bezels in black

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

^{*}Regional applicability.

STANDARD SPECIFICATION

BRAKES

- Front vented 420 x 40 mm disc brakes with Bentley branded red 10 piston brake callipers
- Rear vented 380 x 30 mm disc brakes with red 4 piston brake callipers
- Brake pad wear indicator

WHEELS

- 22" Speed alloy wheel silver painted
- Electronic Tyre Pressure Monitoring System (TPMS)
- 22" summer tyre with Pirelli Noise Cancellation System

SUSPENSION

- Two chamber, two valve air suspension with Continuous Damping Control (CDC)
- Electronic Stability Programme (ESP) with Traction Control (TCS)/Anti-lock Braking System (ABS)/ Electronic Brake Force Distribution (EBD)/Hydraulic Brake Assist (HBA)/ Drag Torque Control (MSR)
- Torque vectoring by electronic differential (eLSD)
- Dynamic ride-height control (auto-adjusts at speed) and ground clearance function
- Bentley Dynamic Ride System with Electronic All-Wheel Steering
- Drive Dynamics Control
- Launch Control

EXTERIOR

- Choice of seven exterior paint colours
- Dark tint radiator matrix with dark tint surround
- Dark tint lower bumper grille
- Speed fender badge
- Power latches to the doors and boot
- Chrome bonnet and boot Bentley wing badges
- 'BENTLEY' lettering on the boot
- Body coloured door mirror caps
- Electrically adjustable door mirrors with heating, power fold, memory and dip on reverse functions
- Auto-dimming door mirrors

- Illuminated 'Bentley' sill and stainless steel 'Speed' treadplates with 'Handcrafted in Crewe, England'
- Speed sport sills
- Jewel fuel filler and oil caps
- Full LED matrix headlamps with high-beam assist and Speed welcome and coming home animation
- Full LED tail lamps with smoked lens and Speed welcome and coming home animation
- Acoustic, heat-insulating, front screen
- Acoustic side glass
- Heated rear screen
- Sports exhaust
- Dark tint chrome slashed oval exhaust finishers
- Rain-sensing windscreen wipers
- Hands free boot

INTERIOR

- Four occupant seating positions
- Precision Diamond Quilt to seats, door casings and rear quarter panels
- Unique 'Speed' mix of Nappa leather and Dinamica to seats, dashboard and lower cabin
- Electric 12-way front seats, heated with two memory functions
- Two rear seats with centre stowage inc. 12 V socket and two USB-C charging points
- Speed embroidered seat emblems
- Speed fascia badge
- Piano Black veneer
- Single tone, three-spoke, hide and Dinamica trimmed heated steering wheel
- Steering wheel mounted gearshift paddles
- Electric tilt-and-reach adjustment steering column with memory and easy-entry functions
- Speed-specific instrument panel graphics
- Sports foot pedals
- Dinamica gear lever
- Dinamica pillars and headliner 15 colours
- Single front armrest (with fore/aft slide) with stowage inc.
 12 V socket and two USB-C charging points

- Stowage to front doors, centre console and under centre armrest
- Lockable glove box
- Metal bulls-eye vents with organ stops
- Bentley analogue clock with plain bezel
- Black seat belt buckles
- Deep pile carpets matched to main or secondary hide
- Standard carpet overmats to the front
- Boot carpet in Beluga
- Two cup holders to rear console
- Sun visors with illuminated vanity mirrors
- Auto-dimming rear-view mirror
- · Footwell illumination and ambient lighting
- Advanced air filtration and display
- Multi-zone automatic climate control
- Air ioniser
- Bright boot finisher
- Boot lid down lighters
- 12 V socket in boot
- Keybox
