THE FLYING SPUR

The Flying Spur

The new Flying Spur is the most finely crafted luxury sedan in the world. Yet in many ways, it is a car that defies categorisation. Because it is a powerful, spacious vehicle with remarkable agility. A grand design with a wealth of intricate details. A meeting of innovative technology and timeless style.

Available in your choice of four stunning models – the Flying Spur, the Flying Spur Azure, the Flying Spur Speed and the Flying Spur Mulliner – it is a car built both for those who love to drive and those who delight in being driven. It is an inspiring luxury four-door car, yet it delivers all the exhilarating performance of a grand tourer. Consider it the best of all worlds.

CO₂ Emissions and fuel consumption data for EU27 is pending, subject to EU Type Approval.

Four exquisite models

The Flying Spur is available in four truly remarkable models, each one combining phenomenal performance with extraordinary craftsmanship.

Flying Spur

The quintessential Flying Spur, offering a stunning fusion of power and luxury.

High Performance Hybrid.

CO₂ Emissions and fuel consumption data for EU27 is pending, subject to EU Type Approval.

Flying Spur

The Flying Spur model is the quintessential Flying Spur, offering the perfect balance of luxury and performance in a stunning, spacious sedan.

An incredible travelling experience for driver and passengers alike, the car is propelled by Bentley's High Performance Hybrid powertrain – an advanced V8 engine coupled with a powerful electric motor for smooth, confident performance.

The attention to detail for which Bentley is renowned is on display throughout the car, from its new, exclusive black matrix grille to an expansive, handcrafted interior that only Bentley could create.

TO DESIGN

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Flying Spur Azure

The Flying Spur Azure offers an elevated level of comfort, with a wealth of features designed to enhance the wellbeing of everyone in the car.

Instantly recognisable thanks to its gleaming Azure exterior badging and contemporary vertical vaned grille, this is a car that exudes gravitas and style, from the moment you see it for the first time.

Inside, a wealth of thoughtful features come together to create the perfect ambience, from air filtration and ergonomic seat technology to the light flooding in through the panoramic sunroof above.

TO DESIGN

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Flying Spur Speed

The Flying Spur Speed pushes four-door performance to the limit, combining unrivalled power with supreme sporting style. Built on the Ultra Performance Hybrid powertrain, it offers a truly exhilarating drive.

Active all-wheel drive comes together with all-wheel steering and the Bentley Dynamic Ride anti-roll system to deliver a drive unlike that of any comparable car. And the power it puts at your disposal is astonishing: 771 bhp (782 PS) and 738 lb ft (1,000 Nm) of torque. That's enough to surge from zero to 60 mph in 3.3 seconds (0 to 100 km/h in 3.5 seconds) – performance previously unheard of for a luxury sedan.

Motorsport-inspired finishes are used inside and out, from its dark tint brightware and exclusive matrix grille to the 3D leather door panels and exclusive quilting inside. It might just be the most thrilling Flying Spur ever created.

TO DESIGN

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Flying Spur Mulliner

The Flying Spur Mulliner represents the pinnacle of craftsmanship and refinement, whether you prefer to drive or be driven.

Powered by the same Ultra Performance Hybrid powertrain as the Flying Spur Speed, it is capable of the same incredible performance – yet its styling could not be more different.

Exquisite craftsmanship is on display everywhere you look, from the floating-diamond Mulliner grille to the self-levelling Bentley badges at the centre of the 22" Mulliner wheels. Illuminated Mulliner treadplates and animated welcome lamps invite you inside, where you can enjoy your choice of eight exclusive hide colourways, plus a new Mulliner quilting pattern and stunning details such as 3D leather door panels.

This is a car for those who demand the best of everything – whether they sit behind the driver or behind the wheel.

TO DESIGN

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

DESIGN

A sense of power

Nobody expects a luxury sedan to perform like the new Flying Spur. But look closely at its sleek design and you may notice some subtle hints. The sweeping roofline gives an immediate impression of speed, as does the power line that flows from the headlamps and runs along the car's profile, while body-coloured lower sills make the car look even closer to the road.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Exquisite details

At the front, a new lower aperture houses intricately designed new grilles, while the main radiator grille features exclusive new designs that reflect the character of your chosen model.

A bright chrome bonnet strip – finished in dark tint on the Speed model – leads to a feature originally seen on the Flying Spurs of the 1950s. Standard on the Mulliner and available as an option on all other models, the Flying 'B' bonnet mascot is a stunning symbol of Bentley power and grace. Available in a choice of chrome or black gloss, it emerges when you unlock the car, its wings' illuminating in time with a welcoming glow from the headlamps.

At the rear, a sleek new diffuser is accompanied by tail lamps inspired by the shape of the Bentley B – ensuring the new Flying Spur leaves a lasting impression.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Design: Flying Spur

The exterior of the Flying Spur model combines sweeping curves with an understated mix of black and bright chrome detailing. The result is a stunning example of elite automotive design.

A choice of seven standard colours increases to over 80 when all optional finishes are considered. Front and centre is a new black matrix grille, accentuated with a chrome surround and centre bar. Matt black lower bumper grilles sit below it, lending the entire front of the car a refined presence.

21" ten twin-spoke wheels complete the picture, with a 22" ten spoke wheel available as an eye-catching optional alternative.

[TO INTERIOR](#)

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Design: Flying Spur Azure

The Flying Spur Azure announces its arrival with a new vertical vane grille, its bright chrome vanes spaced wider than ever, for an even more contemporary appearance. With glittering lower matrix grilles and judicious application of chrome exterior brightware elsewhere on the car, the overall effect is one of truly extraordinary craftsmanship.

At the rear, a body-coloured diffuser blends seamlessly into the car's sleek body. The rich red taillamps come to life the second the car is unlocked, performing a beautiful welcome animation. Large, bright chrome oval tailpipes, meanwhile, provide a spectacular finishing touch.

[TO INTERIOR](#)

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Design: Flying Spur Speed

From the moment you set eyes on the Flying Spur Speed, its character is clear. Elegant and spacious it may be, but it conceals a dark secret: the power to exhilarate anyone who sits behind the wheel.

A dark tint has been applied to its exclusive Speed matrix grille, the lower bumper apertures, the front and rear lights and the remaining exterior brightware, for a more purposeful finish than traditional bright chrome. There is Speed badging and new body-coloured sills, while exclusive 22" Speed wheels complete the picture.

[TO INTERIOR](#)

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Design: Flying Spur Mulliner

The first thing you notice on the new Flying Spur Mulliner may well be its beautiful floating-diamond matrix grille – just part of a suite of sparkling chrome exterior brightware. The exclusive, grey-painted and polished 22" wheels feature self-levelling Bentley 'B' centre wheel badges, while double-diamond wing vents and Satin Silver painted mirror caps draw your gaze in even further.

When you unlock the car, the Flying 'B' bonnet mascot deploys electrically, its wings lighting up to lead the way. And the moment you open the door, the Animated Welcome Lamps by Mulliner project a swirling light show onto the ground, culminating with the Bentley 'wings' emblem.

[TO INTERIOR](#)

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

PERFORMANCE

Looks can be deceiving

No other luxury sedan combines such incredible craftsmanship with such irresistible power. The phenomenal performance of the new Flying Spur – driven by a choice of entirely new hybrid powertrains – is the result of a hundred-year journey to create a vehicle described by W.O. Bentley himself as “a fast car, a good car, the best in its class”.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Two V8 hybrid powertrains

High Performance Hybrid

The Flying Spur and the Flying Spur Azure feature the High Performance Hybrid powertrain. Offering a compelling blend of refinement and power, it deploys the electric motor and V8 engine to deliver 930 Nm of torque and a maximum power output of 671 bhp – which translates into acceleration from 0-60 mph in 3.8 seconds and a top speed of 168 mph.

0 to 60 mph

3.8 seconds (0 to 100 km/h: 3.9 seconds)

Top Speed

168 mph (270 km/h)

Power

671 bhp (680 PS)

Torque

930 Nm (686 lb ft)

Ultra Performance Hybrid

The Speed and Mulliner models feature the Ultra Performance Hybrid powertrain. The combined system is tuned to deliver 800 Nm of torque at just 1,000 rpm, ultimately rising to a full 1,000 Nm. This means that when you accelerate from a standing start, you can reach 60 mph in just 3.3 seconds and, thanks to a maximum power output of 771 bhp, a top speed of 177 mph.

0 to 60 mph

3.3 seconds (0 to 100 km/h: 3.5 seconds)

Top Speed

177 mph (285 km/h)

Power

771 bhp (782 PS)

Torque

1000 Nm (738 lb ft)

Advanced chassis systems

Every Flying Spur features Bentley Dynamic Ride, an innovative 48-volt active roll control system that continuously adjusts the anti-roll bars to reduce body movement especially when cornering.

Torque vectoring, delivered via an electronic limited-slip differential, slows the wheels on the inside of a turn and increases the speed of those on the outside. This enables the car to hold the road more tightly when cornering hard, for a truly thrilling drive.

All-wheel steering is also standard. At low speeds, it shrinks the car's turning circle. But when driving faster, it steers the rear wheels in the same direction as the front wheels, allowing for smoother lane changes and overtaking.

To ensure that a wide range of driving experiences are available through the different Drive Dynamics modes, all models also feature new twin-valve dampers.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

State-of-the-art suspension

Every Flying Spur delivers truly incredible handling, in part due to the inclusion of new twin-valve dampers. They make the suspension system more flexible than ever before, allowing for a more refined ride in Comfort mode, for example – even when negotiating roads with potholes or other surface imperfections. Yet crucially, they also allow for greater control and stability in Sport mode – especially when cornering at speed.

On the Flying Spur Speed and Flying Spur Mulliner – both of which feature the Ultra Performance Hybrid powertrain – this cutting-edge suspension system allows for a more exhilarating Sport Mode than ever before.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Drive electric

To drive with no emissions whatsoever, you can make use of the new Flying Spur's ability to drive in electric-only mode – whichever model you choose. This means the V8 petrol engine is completely turned off and the car relies entirely on its powerful electric motor for propulsion, providing up to 190 PS of power and 450 Nm of torque – more than enough power for both urban and highway driving. Range in this mode is a full 50 miles (80 km) – and emissions, as you might imagine, are zero.

Choose your mode

Like every Bentley, the Flying Spur gives you access to four different driving modes – Comfort, Bentley, Custom and Sport – each of which can be selected using the Drive Dynamics Control.

While Comfort mode prioritises a smooth ride, the specially calibrated Bentley mode delivers the perfect balance of luxury and exhilaration. Custom mode lets you make your own adjustments to the engine, transmission and suspension and in effect, create your own mode. Sport mode, meanwhile, amplifies the driving experience, making the car noticeably more responsive. In the Flying Spur Speed and Flying Spur Mulliner, this allows for an incredibly thrilling drive, allowing full deployment of those cars' power and torque: 782 PS and 1000 Nm respectively.

INTERIOR

A supreme space

In the cabin of the new Flying Spur, space and light come together to enhance the comfort and wellbeing of every occupant. The wide centre console gives rear-seat passengers access to USB-C charging ports, with a wireless charging option available. It also houses the Touch Screen Remote, for access to many of the car's comfort and infotainment features, from seat massage to controls for the audio system.

Standard on the Mulliner and Azure models and available as an option on all others, a panoramic sunroof fills the cabin with natural light. All the colour-matched Dinamica blinds can be closed simultaneously, with a single tap on the Touchscreen Remote.

The four-seat configuration – standard in the Flying Spur Mulliner – offers two sculpted outboard rear seats, providing the same supreme comfort and support as the front seats, not to mention a more imposing look. It also allows for a longer centre console to run between them, offering wireless phone charging, two USB-C sockets, a 12-volt socket, two cupholders and additional stowage space.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Obsessive attention to detail

Wherever your gaze falls, there are stunning details to appreciate.

Jewel-like diamond knurling, for example, can be found on all rotary switches and indicator stalks. As an option, it can also be applied to the bullseye vents, the clock and the centre vent, where 5,331 individual diamond shapes are created using a bespoke software algorithm.

The new Dark Chrome Interior Specification allows you to specify a darker finish for much of the chrome interior detailing, from the steering wheel and gear lever to the door handles and speaker grilles. This option also changes the gloss black switchgear to matt black, for a sportier aesthetic, while also changing the centre console to satin black.

The Côtes de Genève finish, meanwhile, takes the form of sheet aluminium just 0.6 mm thick, machined at an angle to achieve a truly three-dimensional finish.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

A new standard for comfort

Installed as standard in every Flying Spur, the luxurious Front & Rear Comfort Specification offers a six-setting massage function in all four seats, alongside numerous options for adjustment of the headrests, cushions and backrest bolsters.

New Wellness Seating – installed as standard in the Mulliner and Azure models and available as an option across the rest of the range – includes two innovative features to maximise your comfort and wellbeing. Seat Auto Climate, which monitors the humidity and temperature at the surface of each front seat and uses a combination of heating and ventilation to respond automatically, keeping you comfortable at all times. It also includes Postural Adjust, which uses a series of air cushions inside each front seat and outboard rear seat to vary the pressure on your muscles throughout your journey. Although the effect is imperceptible on the lowest settings, it reduces fatigue and stiffness significantly, especially when you are in the vehicle for a long time. As a result, you can get out of the car feeling comfortable, even after the longest of journeys.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

MULLINER

MULLINER

A breath of fresh air

A new air conditioning system improves cabin air quality and reduces the number of harmful PM2.5 particles to which you and your passengers might otherwise be exposed.

The new system monitors the atmosphere inside and outside the cabin, while filtering out the pollutants. The interior and exterior readings can be seen on the 'Air Quality' panel on the central touchscreen. It also models CO₂ concentration. Provided levels are judged to be low outside the vehicle, clean fresh air is drawn in. If not, the air inside is recirculated instead.

The system can even detect tunnels using GPS data, switching to recirculation mode before you enter, to maximise air quality in the car. When you exit the tunnel, it switches back to drawing in air from outside. To save energy, it can even detect whether anyone is sitting in the rear seats. If not, performance in the back of the cabin is automatically reduced.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Azure

Digital details.

The new digital driver's information panel behind the steering wheel can be displayed with a choice of different graphic design schemes to match your taste. There are four different options on each model, with the Azure, Speed and Mulliner models featuring exclusive designs.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Interior: Flying Spur

Crafted by hand to deliver an experience unlike anything possible in a mass-produced car, the Flying Spur's cabin features a stunning combination of natural materials, coupled with the latest in digital technology.

Hand-finished, fluted Nappa leather seats are teamed with Dinamica on the roof lining and the headrest cushions in the rear. The hard surfaces are clad in handcrafted high-gloss Crown Cut Walnut veneers, with a wide range of optional alternatives available, including more high-gloss woods, open-pore woods, new gloss-painted 'piano' options and technical finishes such as Carbon Fibre.

When you commission a Flying Spur, the opportunity to make its interior unique is practically limitless.

[SPECIFICATIONS AND OPTIONS](#)

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Interior: Flying Spur Azure

The interior of the Flying Spur Azure is dedicated to the wellbeing of all four occupants.

'Azure' emblems adorn the fascia and each of the four Nappa leather seats, which feature luxurious Harmony Diamond Quilt. Three-dimensional Harmony Diamond Hide has been applied to the door panels, with Dinamica to the headlining. The upholstery can be commissioned in a single-colour or duo-tone colourways, using your choice of 15 hide colours, and you can add contrast stitching in a wide range of colours.

You can also choose the Dark Chrome Specification, which changes the bright chrome controls and switches to a more understated, sports-inspired combination of dark chrome and matt black.

SPECIFICATIONS AND OPTIONS

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Interior: Flying Spur Speed

Inside the Flying Spur Speed, sporting style is in evidence wherever you look, from the new, performance-themed graphics in the instrument panel, right down to the sports pedals at your feet.

The seats feature 'Speed' embroidery and a new, tactile quilting design, to complement the distinctive new 3D leather panels on the doors. The combination of leather and Dinamica is exclusive to the Speed model, while veneer options take in the full range of wood finishes, as well as more technical materials such as Engine Turned Aluminium or Côtes de Genève. You can opt for Dual Veneers by Mulliner, or Piano Black veneer with an optional colour-matched pinstripe. The optional Dark Chrome Interior Specification, meanwhile, renders many of the chrome elements in a darker tint.

[SPECIFICATIONS AND OPTIONS](#)

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Interior: Flying Spur Mulliner

As you step over the illuminated treadplates, you will be greeted by sumptuous Nappa leather in your choice of eight exclusive three-colour combinations, each featuring contrast and accent stitching. Alternatively, you can create your own, from Bentley's extensive palette of hide colours. Sustainable olive tanned leather, meanwhile, has been used where appropriate, as well as tactile 3D leather on the doors. With a new Mulliner quilting pattern and 'Mulliner' seat emblems, the entire cabin is a showcase of interior craftsmanship.

A stunning Mulliner clock draws the eye, as do chrome air vents and overlays on the Grand Black fascia, waistrails and picnic tables.

Piano veneers are now also available in other stunning colours. The fascia and centre console, meanwhile, can be treated with a choice of woods or technical finishes.

SPECIFICATIONS AND OPTIONS

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

TECHNOLOGY

Intuitive technology

Every Flying Spur is equipped with the latest driver assistance technology, alongside a suite of Connected Car services, accessible both in-car and remotely, via the My Bentley app. The vehicle can harness infrastructure data to deliver services including real-time traffic information, green traffic light prediction and swarm services from other road users to warn you of potential hazards.

Inside, you can use the new My Bentley App Studio to download your personal choice of applications – which means you don't have to worry about your phone battery draining while you use it for music or navigation, for example. And if you do choose to use a third party navigation app, it will have access to your vehicle's fuel and/or charge levels, for more accurate journey planning.

You can even assign certain frequently-used functions – for example switching navigation announcements on or off – to a custom switch on the steering wheel, for easier access while driving.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Effortless manoeuvres

A suite of driver assistance systems makes the Flying Spur easier to drive than ever – especially when parking and manoeuvring at low speeds.

Parking made even easier

The new Intelligent Park Assist* function can identify a suitable parking space, then take control of the steering, pedals and gears while it parks your car. And for occasions when the space is so tight that it would be hard to get in or out of the vehicle once parked, you can use My Bentley Remote Park Assist*, a feature accessed via the My Bentley smartphone app. Simply step out of the car before it parks and tap the button in the app that activates remote parking. Then hold the button down until your car has safely parked itself. Your car will stop moving straight away if you stop holding the button for any

reason. When you return to your car, you can also use Remote Park Assist* to drive it out of the parking space, so you can comfortably get back in.

Assistance when you need it most

When manoeuvring in extremely tight spots or crowded locations, new 3D Surround View allows you to choose the best view available from the four different cameras on the car or, alternatively, see a 3D view of the overall environment around the vehicle.

Manoeuvre Assist provides an extra layer of safety for you and your car, by monitoring the environment in hard-to-navigate spaces and braking automatically if your car looks likely to collide with anything.

*The driver must constantly supervise the manoeuvre and be able to intervene at any time to maintain safety.
Please refer to Specifications and Options pages for standard and optional features.
Not all options are available on all models and within all markets

Embrace the open road

Every Flying Spur is equipped with a number of new driving assistance features that make driving long distances more comfortable, such as Adaptive Cruise Assist, Lane Assist and matrix headlamps with High Beam Assist. The Touring Specification provides even more intuitive assistance for long-distance touring.

More comfortable cruising

The specification includes Adaptive Cruise Assist with Lane Guidance, which enables you to take your feet off the pedals when driving on the highway. As long as you keep your hands on the wheel, it will ensure you stay in the centre of your lane and maintain a safe gap between your car and the car in front – even if traffic slows to a stop and starts again.

Going beyond the highway

Predictive Adaptive Cruise Assist takes these functions further, by offering the same convenience when you leave the highway. Using data from the

navigation system, it can continue to safely control your speed, accelerating or braking as necessary to account for speed limit changes, bends in the road, junctions and roundabouts.

Safer driving at night

The night vision camera makes driving in darkness safer – especially in situations where obstacles could be present outside or beyond the headlamp beams. The view from the camera is shown on the driver's information display, highlighting the presence of people or animals in your car's path.

Key information at eye-level

The Touring Specification also includes a Head-Up Display, which projects key driving information into your line of sight, so you never need to take your eyes away from the road.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Connect to more

The Flying Spur is equipped with a wide range of Connected Car services*, accessed in-car or remotely via the My Bentley app.

Seamless integration

You can input a destination into the navigation system via the My Bentley smartphone app when you're away from your car, so you're ready to go the moment you get behind the wheel. Real-time traffic information can then dynamically re-route your journey if there is congestion, while Green Traffic Light Prediction will aid smooth passage through junctions.

Your choice of apps

With the new My Bentley App Studio, you can opt to download and use many third party apps for navigation, music, video and more, all within the Bentley infotainment system, accessed via the central touchscreen. This means you can use your preferred navigation system, for example, complete with integrated information from your vehicle, such as fuel and/or charge levels.

A personal experience

In the majority of markets*, your Flying Spur is connected to the cloud, enabling all your personal settings to be stored remotely and accessed by the car as required. This means that even if you move between compatible Bentleys or to a new one, all navigation system destinations, light settings, seat settings and even your favourite radio stations can be downloaded immediately, making them available from the moment you get in.

A warm welcome

You can use the My Bentley app to remotely check the status of your locks, lights, mileage and fuel, as well as your electric-only range. You can also remotely pre-heat or pre-cool the cabin, with My Cabin Comfort. Just select your desired temperature and let the car's climate control system do the rest. You can even opt to heat individual seats, armrests and the steering wheel, or defrost the windows remotely, before your journey begins.

Leading the charge

E-charging allows you to plug your car into a charger and activate the charging process remotely via the app. Just enter the time you plan to set off, and the charging system calculates a charge rate that will give you the highest possible level of charge, just in time for your departure.

You're in safe hands

Emergency features include Private eCall and Roadside Assistance, which automatically connect you to a Bentley Emergency Call Centre or the Bentley Roadside Assistance team in the event of an accident. Furthermore, Theft Alert will notify you if the alarm is activated, giving you complete peace of mind.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.
*Vehicle connectivity and service availability varies by market. Please confirm specification with your local certified Bentley Retailer.
** With additional data plan purchased through a mobile network operator.
Android is a trademark of Google LLC.
Apple CarPlay is a registered trademark of Apple Inc.

Wireless by design

Internet connectivity is available for all occupants throughout, thanks to a built-in Wi-Fi hotspot.*

Content on your phone can be accessed in your car wirelessly, through Android™ Auto or Apple CarPlay®, which now works in full-screen mode. Online natural speech interaction, meanwhile, lets you activate over 200 car functions by voice, so your hands needn't leave the wheel.

Wireless phone charging is integrated in the stowage area forward of the gear lever, while USB-C ports are also included, for connecting devices that do not support wireless charging.

*With additional data plan purchased through a mobile network operator. Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Incredible audio systems

The Flying Spur can be commissioned with a choice of three audio systems. The Bentley Signature Audio system with 650 Watts is tuned by Bentley, or you can choose the 1,500 Watt Bang & Olufsen audio system with BeoSonic sound control.

For really serious audiophiles, the Naim for Bentley premium audio system packs in 18 separate speakers, each with its own amplification, delivering a mighty 2,200 Watts of power. Plus, with two active bass units in the front seats, it really does deliver the ultimate audio experience.

The Bentley Rotating Display

Standard on the Flying Spur Mulliner and optional on all other models, the Bentley Rotating Display is a unique demonstration of Bentley's remarkable approach to technology and craft – a three-sided instrumentation panel that allows you to choose how much modern technology you want to see.

Before you switch the engine on, all you see is a smooth, veneered section of the fascia. On starting the car, however, the entire panel will rotate, offering you the first of two alternatives.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

The Bentley Rotating Display

On ignition, the 12.3" high-resolution touchscreen rolls into view, allowing you to enjoy the full range of the car's infotainment technology. Designed for unrivalled ease of use, it features a proximity sensor that highlights its onscreen controls as you reach towards it.

The screen itself can be configured to display specific information of your choice, or a combination of up to three windows at once. For example, you could view the navigation map, music controls and your mobile phone call list at the same time.

To see the final face of this three-sided display, however, a further rotation is required.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

The Bentley Rotating Display

Pressing the 'Screen' button rotates the display one more time. The touchscreen rotates out of view and into its place rolls a veneered fascia panel into which three beautifully crafted analogue dials have been set, complete with polished chrome bezels. This is a feature unique to Bentley, reflecting a more classic style of instrumentation and a bygone age of grand touring.

For an even more minimal driving experience, you can hold the 'Screen' button for two seconds, which rotates the display twice rather than once, allowing you to drive with just the unadorned veneered panel visible. It's up to you.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Charging and driving your car

The hybrid powertrains in the Flying Spur offer five driving modes.

EV Drive: The default mode when you start the car, it offers emission-free, electric-only driving. It can take you up to 50 miles (80 km) without engaging the V8 engine, at speeds of up to 87 mph (140 km/h).

Hybrid: the car will intelligently decide when to employ the engine and when to use electric power alone, for optimum fuel efficiency and emissions. It will base its decisions on your speed and the road type. If you are using the navigation system, the car can automatically switch between electric and petrol power according to your route.

Hold: preserves battery charge for later use, relying instead on the power of the V8 engine. While it will employ the electric motor at times, it optimises the system for dynamic driving.

Charge: the engine is used to charge the battery on the move. This makes it less fuel-efficient than Hold, however it can charge the battery up to 80%.

Sport Hold: Putting power and exhilaration first, this is the default when the Drive Dynamics control is set to Sport. It runs the V8 engine at all times, boosted by the electric motor, to unleash the car's full power.

When plugged in at home, the car can achieve a full charge in as little as two hours and 45 minutes. The E-Charging service – accessible via the My Bentley smartphone app or the car's navigation system – helps you find the nearest public chargers when you're on the road.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

PERSONALISATION

Express yourself

With a host of accessories and styling options allowing you to configure your Flying Spur to your personal taste, it is highly unlikely you will ever see another one like yours.

You can choose from an extensive palette of exterior paint colours, all of which are designed to maintain their brilliance for many years to come. With numerous different wheel designs, hide options, beautiful natural veneers and distinctive trim options, almost every visible feature of your car can be customised to your own specification.

Exterior colours

Your Flying Spur can be commissioned in a choice of seven exterior colours, as standard.

In addition, you can also choose from an extended range and a palette of Mulliner paints that includes a vast range of solid, metallic, satin and pearlescent options. In all, there are more than 80 colours to explore.

For the ultimate in personalisation, Personal Commission Paint by Mulliner allows you to match a colour that is as unique as you are.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Wheels

Your choice of wheel can subtly or dramatically alter the character of your Flying Spur. That's why there is a choice of wheel designs and finishes on offer.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

22" Mulliner alloy wheel – black painted and polished with self-levelling badge

22" Mulliner alloy wheel – black painted with self-levelling badge

Veneers

You can choose from several high-gloss and open pore wood veneers, and several gloss painted finishes that can be applied to the fascias and waistrails. Dual Veneers by Mulliner see your choice of high-gloss wood combined with Grand Black, with an eye-catching chrome pinstripe separating the two finishes.

You can also opt for technical finishes including Dark Tint Engine Turned Aluminium, Dark Tint Diamond Brushed Aluminium, Diamond Milled Aluminium and Carbon Fibre. For the centre console only, there is Côtes de Genève.

You can even opt to add gleaming chrome details to the veneer itself. This stunning, handcrafted finish adds a layer of metal to the veneer during construction. Less than 0.1 millimetre thick, these overlays sit virtually flush to the veneer's surface.

Please refer to Specifications and Options pages for standard and optional features.

Hide colours

Every inch of the leather upholstery in the Flying Spur is carefully considered – and crafted by hand. From the fascia to the blind stitching, many different areas require a specialised approach. Sections of the hide with high natural elasticity are reserved for curved surfaces like the seats, rather than for piping or flatter areas such as door inserts. The steering wheel is covered in a highly resistant leather to ensure the natural chemicals from the driver's skin are not absorbed, optimising grip, comfort and longevity. And in the Mulliner model, selected areas of the cabin have been upholstered with new olive tanned hides, created using a more sustainable production process.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Specification packages.

To make it even easier to specify your Flying Spur, our engineers and designers have created packages of features, from technology specifications that make driving easier to styling enhancements to suit your taste and lifestyle.

TOURING SPECIFICATION

Digital assistance features for effortless cruising:

- Adaptive Cruise Assist with Lane Guidance*
- Predictive Adaptive Cruise Assist*
- Night Vision
- Head-Up Display*

COLOUR SPECIFICATION

Opens up a range of additional interior options for the Flying Spur.

- Choice of two tone interior colour combinations
- Ten additional hide colours

MULLINER COLOUR SPECIFICATION

Eight new colours available for all stitching options.

MULLINER BESPOKE INTERIOR

Fully customise the Mulliner tri-tone interior with free colour choice.

DARK CHROME INTERIOR SPECIFICATION

Recommended in conjunction with exterior Blackline Specification. Includes but not limited to:

- Door handles and switches
- Speaker grilles
- Bullseye air vents
- Organ stops
- Detailing on drivers instrument panel and steering wheel
- Gear lever
- Centre stack and centre console
- Headrest trim

BLACKLINE SPECIFICATION

Replaces the exterior brightware with a gloss black trim:

- Black Bentley Wing badges and lettering
- Black gloss bumper lower matrix style grille surround
- Black gloss rear number plate surround
- Black gloss side window surrounds
- Dark [chrome](#) tailpipes
- Black gloss wing vent
- Painted radiator shell with black gloss matrix style grille and black surround

MULLINER BLACKLINE SPECIFICATION

- Black door handles
- Black radiator bezel matrix with black and silver edge
- Black Mulliner wing vents
- Black exterior brightware
- Black tailpipes
- Beluga mirror tops
- 22" Mulliner wheel in full black, or black and bright polished

MOOD LIGHTING SPECIFICATION

- Multi-coloured mood lighting with seven different colours in two palettes, vibrant and muted, plus matching illuminated treadplates
- Memory function within the Touch Screen Remote

FRONT & REAR COMFORT SPECIFICATION

The ultimate in Bentley comfort:

- Ventilated seats
- Multi-mode massage seats
- Adjustable cushion length
- Adjustable side bolsters
- Electric headrests
- Hide-trimmed seat belt buckles
- Heated armrests

WELLNESS SEATING

The ultimate in Bentley comfort:

- Postural Adjust
- Seat Auto Climate

LEATHER SPECIFICATION

Hide replaces Dinamica throughout:

- Seats
- Fascias
- Steering wheel
- Hide trimmed gear lever

DIAMOND KNURLING SPECIFICATION

An intricate metal treatment applied to additional elements of the fascia and console:

- Knurled bulls-eye air vents
- Knurled dashboard clock bezel
- Knurled organ stops

STYLING SPECIFICATION – BODY COLOURED

- Front splitter
- Rear diffuser
- Side sills

SMOKER'S SPECIFICATION

- Cigar lighter to front and rear console
- Solid metal ash cans – one to front and two to rear cabin

*Regional applicability. Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Luggage set

Among the accessories available for the new Flying Spur is an elegant, four-piece luggage set. Crafted in Gravity Grey leather from Italian artisans Pasubio – who are also responsible for the hides used in the car's cabin – it comprises three spacious Weekender bags, each measuring a generous 56 cm x 28 cm x 26 cm, plus a handy backpack. Together, they are sized to fit in the boot perfectly.

Bespoke commissioning with Mulliner

In the early days of motoring, a new car would consist of an engine, drivetrain, four wheels and a set of controls – nothing more. Everything else was created by a coachbuilder, such as Mulliner.

Today, Mulliner works within Bentley to offer a variety of premium features and optional finishes, alongside bespoke customisation services.

For example, the Mulliner team offer an even greater range of colours and finishes for both the exterior and interior of your Bentley, including painted wheels, stone veneers and colour-matched piano veneers. Further examples include personalisation with embroidery for your seats or chrome overlays to your veneers.

On top of that, the Mulliner team can colour match any object you provide to create a unique paint or hide colour. You can even work with them to design truly bespoke content for your car.

To learn more, visit the website or ask your Retailer about the Mulliner Personal Commissioning Guide.

Please refer to Specifications and Options pages for standard and optional features. Not all options are available on all models and within all markets.

Accessories, servicing and maintenance

Genuine Bentley accessories represent an opportunity to personalise your Flying Spur even further. From the sleek aesthetic enhancements of the Styling Specification to Paint Protection Film to preserve your car's striking looks, there are numerous options available to suit your needs. Moreover, they are all designed specifically by Bentley for your Flying Spur.

Consider this just one reason to bring your vehicle back to an official Bentley Retailer. No one else has the same expertise, the Bentley-trained technicians or access to genuine Bentley parts – not to mention Service and Maintenance products that can give you complete peace of mind, throughout your vehicle's lifetime. There is no better way to keep your Flying Spur close to the impeccable condition it was in, the day it left the factory.

Financing your Flying Spur

Our finance agreements are tailored to ensure you make the most of your investment. While other financiers look only at the circumstances of the customer, Bentley Financial Services creates bespoke packages, based not just on your needs and income, but also on the vehicle you have in mind.

BENTLEY

The Bentley Collection

The Bentley Collection is a selection of lifestyle products inspired by the distinctive design of our cars. With many items lovingly crafted by highly skilled artisans, the Bentley Collection takes our exciting heritage and vision for the future, and seamlessly weaves it into extraordinary statement pieces.

From unique pieces for the home that elevate your everyday life, to lovingly crafted clothing and accessories designed with a distinctive eye for detail, you can bring Bentley's unrivalled refinement to every aspect of your life.

To view the complete range, please contact your local Bentley Retailer or visit the online store at [BentleyCollection.com](https://www.bentleycollection.com)

The Bentley Experience

Exclusive to customers, these unique tours offer unrivalled opportunities to explore behind the scenes at the Home of Bentley in Crewe and visit the flagship showroom, CW1 House.

Our knowledgeable hosts will share rare insights into the design and engineering process. You will meet the craftspeople who build your car and discover the innovations and techniques they're using to craft a sustainable vision of the future.

Available as an on-site, real-world experience or as a virtual tour, the Bentley Experience offers a truly tailored journey, with your questions answered by our experts along the way. There is simply no better way to understand the passion that goes into every Bentley.

SPECIFICATIONS & OPTIONS

Flying Spur

STANDARD SPECIFICATION

BRAKES

- Front vented 420 x 40 mm disc brakes with Bentley branded black brake callipers
- Rear vented 380 x 30 mm disc brakes with black brake callipers
- Brake pad wear indicator
- Electronic parking brake with drive away assist

WHEELS

- 21" Ten twin spoke wheel – painted
- 21" Summer tyre with Pirelli Noise Cancellation System
- Bentley 'B' badges to wheel centres
- Electronic Tyre Pressure Monitoring System (TPMS)
- Tyre inflation kit

SUSPENSION

- Bentley Active Chassis with comfort steering and comfort damper calibration
- Two chamber, two valve air suspension with Continuous Damping Control (CDC)
- Electronic Stability Control (ESC) with Traction Control (TCS)/Anti-lock Braking System (ABS)/Electronic Brake Force Distribution (EBD)/Hydraulic Brake Assist (HBA)/ Drag Torque Control (MSR)
- Torque vectoring by electronic differential (eLSD)
- Dynamic ride-height control (auto-adjusts at speed) and ground clearance function
- Bentley Dynamic Ride
- Electronic all-wheel steering
- Drive Dynamics Control
- Eight speed dual clutch transmission
- Active all-wheel drive

EXTERIOR

- Choice of seven exterior paint colours
- Black matrix grille with chrome surround and centre bar
- Matt black lower bumper grilles
- Chrome Bentley wing badges to bonnet and boot
- Chrome 'BENTLEY' lettering on the boot

- Chrome exterior brightware

- Rear seats – electric 14-way adjustment with heating, ventilation, massage and two memory positions
- Seatbelts colour-matched to hide colour, with hide-trimmed buckles
- Driver and front passenger airbag with front passenger airbag deactivation
- Side airbags front and rear with curtain airbags

- Child seat anchor for child seat system ISOFIX and rear outer ISOFIX with outer top tether
- Single front centre armrest with heating and fore / aft slide adjustment
- Wireless phone charger and 2 x USB-C charging sockets
- Heated armrests to all four doors
- Fold-down, heated rear centre armrest with stowage, twin cup holders 12V socket and two USB-C charging points
- Stowage to four doors and front and rear centre consoles
- Single tone, three-spoke, hide trimmed heated steering wheel
- Steering wheel mounted gearshift paddles
- Electric tilt-and-reach adjustment steering column with memory and easy-entry functions
- Standard foot pedals
- Leather trimmed gear lever
- Crown Cut Walnut veneer
- Metal bulls-eye vents with organ stops
- Satin chrome, sculptural centre air vent with Bentley analogue clock
- Lockable glove box
- Deep pile cabin carpets
- Standard carpet overmats to the front and rear
- Boot carpet in Beluga
- Two cup holders to the front centre console and two to the rear centre armrest
- Sun visors with illuminated vanity mirrors
- Auto-dimming rear-view mirror
- Footwell illumination and ambient lighting
- Advanced air filtration and display with particle matter sensor
- Multi-zone automatic climate control
- Air ioniser
- Boot lid down lighters
- 12V power sockets (x2 cabin, x1 boot)
- Keybox

TECHNOLOGY

- Infotainment system with 12.3" high-resolution capacitive touchscreen display. Proximity sensors and hard key controls. Digital radio, HDD-Navigation, advance music interface (AMI), Bluetooth (A2DP) and Wi-Fi (uPnP) streaming
- Navigation – featuring text-to-speak, voice destination entry and 3D building display
- Touch Screen Remote control for rear cabin
- Wireless Apple CarPlay®*
- Wireless Android Auto*
- 60 GB solid-state drive (10 GB available user space)
- 4G LTE telephone module*
- Bentley Signature Audio
- Bluetooth and Wi-Fi audio streaming

DRIVER ASSISTANCE SYSTEMS

- Driver Assist Environmental Display
- Adaptive Cruise Assist*
- Lane Assist
- Blind Spot Warning
- Adaptive brake lights*
